

Lower The Cost of 5-Axis Machining!

www.jergensinc.com/5axis

You've invested in a 5-axis machine to help you increase productivity and lower costs. Now, Jergens can help you maximize the benefits of your machine with a full line of 5-axis workholding solutions.

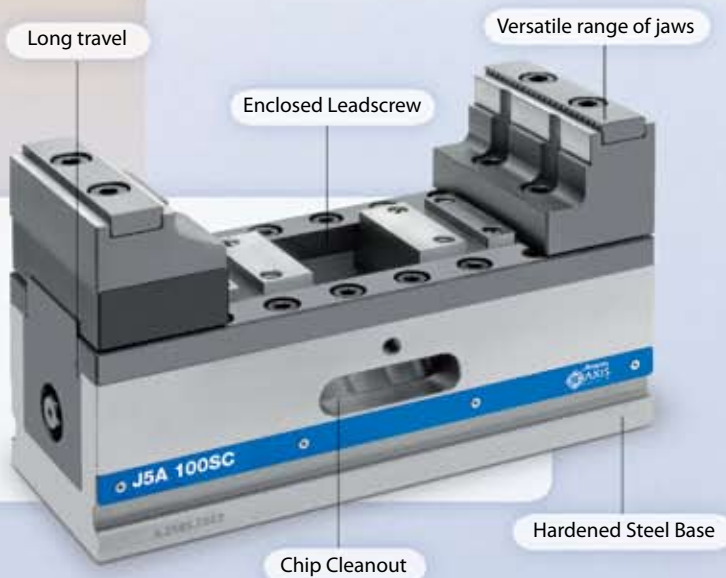

Benefits

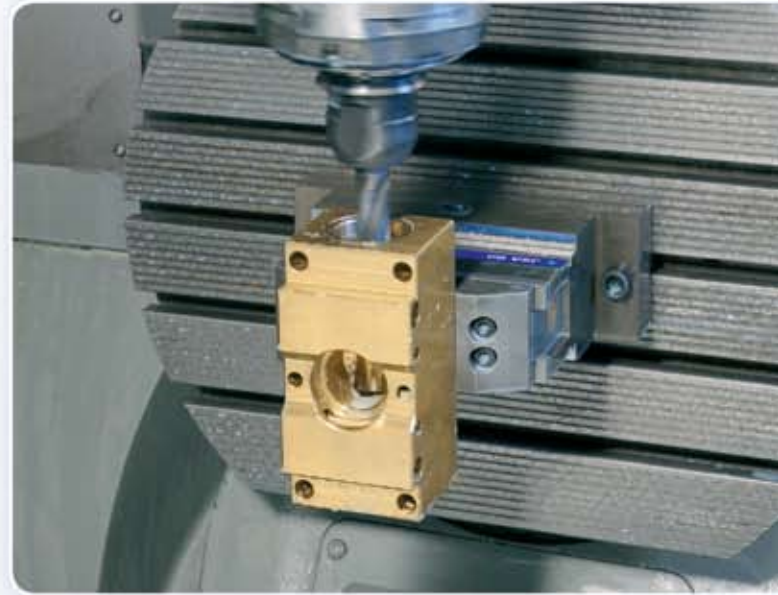

Complete many projects with just one set up and maximize the benefits of your 5-axis machine!

- High clamping forces permit high cutting rates
- Accurate repeatability
- Fast set up and changeovers
- High productivity
- For complex components/materials
- Use of short standard tools
- Excellent tool access

5-Axis Self Centering Vise

5-Axis Fixed Jaw Vise

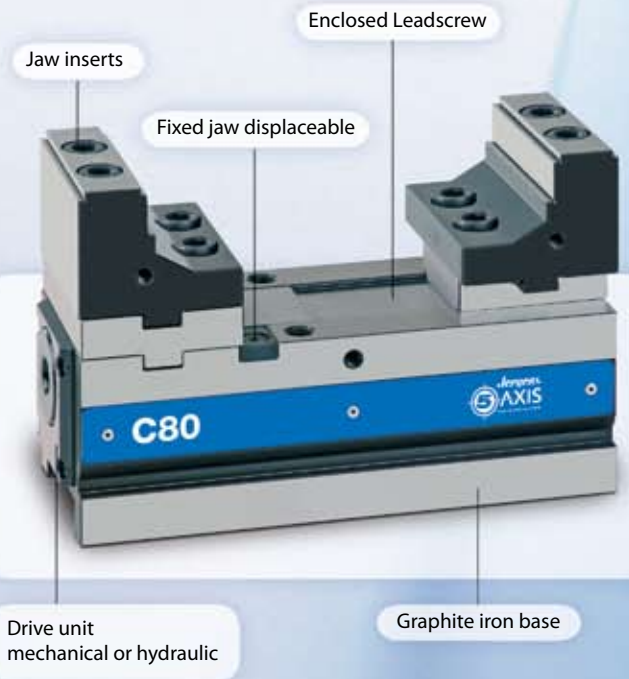

5-Axis Quick Clamping Block (QCB)

With its integral mechanical Zero Point Clamping System, the QCB allows for rapid and precise changeover for increased productivity and reduced costs.

5-Axis Compact Vise

Contact Jergens today to find out how we can help you lower the cost of 5-axis machining! www.jergensinc.com/5axis
