

Bolster Plate Bushings 3.5

Installation and Removal
Instructions 3.2

Internal Locking Thread
Repair Insert 3.8-3.9

Keylocking, Extra Heavy Duty
Industrial Style 3.6

Keylocking, Heavy Duty
Industrial Style 3.4

Keylocking, Metric/Inch 3.5

Keylocking, Solid Industrial Style 3.7

Keylocking, Thinwall
Industrial Style 3.3

Miniature Metric
Mil Spec Inserts 3.10-3.11

Thread Repair Kits 3.12-3.15

Installation Information

1. Drill to allow full tap depth shown in chart. Note: Tap drill is oversized; see chart below. Countersink as shown in chart.

2. Tap to depth shown in chart.

3. Install insert .010" to .030" below surface.

4. Drive keys down with proper installation tool.

Removal Information

Jergens Keylocking Inserts can be removed without damage to the parent material.

1. Drill the insert to the size and depth shown under removal data in the chart below.
2. Bend the keys down and break them off.
3. Remove the insert using an E-Z out or similar tool.

Installation Information Preparation of External Threads Prior to Installation (For Keylocking Inserts Only)

NOTE: Install insert .25mm to .76mm below surface and drive locking keys down. See C'sink Diameter column above.

Keylocking Inserts Metric/Inch Inserts

Create Metric Holes... With Inch Taps!

This unique product allows you to create a metric thread utilizing inch drills and taps. The insert O.D. is inch sized, the I.D. is metric.

Metric Internal/Inch External - Heavy Duty Industrial Style

Part Number Carbon Steel	Insert			Installation					Removal	
	Internal Thread Class 6H	External Thread Class 2A	Length L	Installation Tool Part Number	Tap Drill Size	C'sink Diameter +.010 -.000	Thread Tap		Drill

All dimensions are in inches except for internal thread, which is metric.

Bolster Plate Bushings

- Material: Stressproof
- Finish: Black Oxide
- Internal Thread: 2B-UNC
- External Thread: 2A-UNF

Repairs are made quickly, easily, and right on the machine. Re-tap bolster plate hole, insert the threaded bushing to match, use a locking type sealant to lock the bushing in place. The Bolster Plate Bushings can also be used as threaded bushings in cast iron machine bases where greater thread strength is necessary. Eliminates the problems of "pulled-out" cast iron threads, reduces the need for bulky threaded cast iron sections.

Part Number	Internal Thread	External Thread	L	Wt. (lbs) 10 Pcs.
11701	3/8-16	3/4-16	1 1/2	1.25
11702	1/2-13	1 -14	1 1/2	2.20

11705	1 -8	1 1/2-12	2	5.15

Keylocking Inserts

Extra Heavy Duty

Industrial Style

The increased wall thickness and greater external thread area of these extra heavy duty threaded inserts offer greater pull-out strength, stability, and longer life. These inserts should be used in materials with lower ultimate shear strength to obtain maximum pull-out strength and holding power.

- Greater Thread Area
- Increased Shear Engagement
- Offers Holding Power Comparable to Standard Heavy Duty Inserts in High Shear Strength Material
- Material: Carbon Steel Inserts - C1215 or equivalent
Stainless Steel Insert - 303
Keys - 302
- Finish: Carbon Steel Inserts - Parkerized
Stainless Steel Inserts - Passivated
- Tolerances: $\pm .010$
- Keys: Inserts with internal thread size of 5/16-18 or larger are furnished with four locking keys.

Inch Thread Repair Insert Kits

The Jergens Keylocking Inserts provide strong and durable threads in most types of material. They are easily installed using standard drills and taps.

The Jergens Thread Repair Insert Kits include inserts, an installation tool, and installation and removal instructions.

The Kits are available with either inch, metric, or metric internal/inch external carbon steel inserts.

Each Kit is comprised of one size of insert in various quantities. For Thread Repair Kits that include several different sizes, see pages 3.12 - 3.13.

Metric Thread Repair Insert Kits

The Jergens Keylocking Inserts provide strong and durable threads in most types of material. They are easily installed using standard drills and taps.

The Jergens Thread Repair Insert Kits include inserts, an installation tool, and installation and removal instructions.

The Kits are available with either inch, metric, or metric internal/inch external carbon steel inserts.

Each Kit is comprised of one size of insert in various quantities. For Thread Repair Kits that include several different sizes, see pages 3.12 - 3.13.

THE *Jergens*® DIFFERENCE

Keylocking Inserts

OURS

Jergens keylocking inserts are easy to install with standard drills and taps.

THEIRS

Competitive thread repair devices require special drills, taps, and installation tools.

JERGENS KEYLOCKING INSERTS

VS. THREAD REPAIR FROM OTHER MANUFACTURERS

Easy installation requires no special tools: uses standard drills and standard taps.

Installation requires special drills, taps, and installation tools.

“Keys” mechanically lock the insert into the base material.

Springs or locking patches do not mechanically lock the insert.

Rated among the highest in pullout strength of any thread repair device on the market.

Less pullout strength versus Jergens inserts.

Wide variety of styles, including thinwall, heavy duty, extra heavy duty, and solid inserts in both stainless steel and carbon steel materials.

Limited offerings may force you to settle on a device that doesn't meet all of your needs.
