

THE **Jergens** DIFFERENCE

T-Slot Bolts

OURS

Precision Machined

Precise angles for greater engagement.
Longer life means more value!

THEIRS

Forged Complete

Cheap t-slot bolts are a bargain only once!

JERGENS T-SLOT BOLTS

Precision machined for maximum T-slot engagement. This reduces wear on the T-slot rails as well as on the T-slot bolt itself.

Manufactured from high grade alloy steel, then heat treated to 150,000 psi tensile strength, which contributes to longer part life.

Jergens maintains a large inventory of bolt blanks, making custom orders possible and allowing quick delivery.

VS. COMPETITORS' T-SLOT BOLTS

Many manufacturers make a completely forged product with non-precise edges. This creates wear on both the bolt and the T-slot rails.

Many competitors use lower-grade material and may not heat treat their bolts.

As product is either imported or forged complete, custom orders are limited, impossible, or require substantial lead times.
